

# Think of it as your child's college education.

It's not just a seedling. It's a world of infinite potential. The great outdoors. The good life. An investment in a better life for those you love.

Which means someday you might consider selling your trees. To help you sort it out, we'd like to send you a free copy of *A Simple Guide To Managing And Harvesting Your Trees*. Just send us the coupon or call 1(800)284-5347.

It could lead to some other good things for your children too. More trees.
