

Brought To You By The New Roper Sanitary Rotary Lobe Pump.

Introducing the Roper sanitary rotary lobe pump designed specifically for the increased demands of today's food and drug industries.

With the Roper sanitary pump, you get superior product integrity. And you get it *your* way. Because it's the first rotary lobe pump to give you the choice of manually cleaned, CIP (cleaned-in-place) or aseptic liquid ends.

Whatever your needs, there's a Roper pump

that can meet them efficiently and economically. Available in 17 standard 3A- approved models that comply with FDA specs, it can handle liquid viscosities from 1 to 1,000,000 cps, temperatures from -22°F to +392°F and pressures up to 290 psi for maximum capacities of 975 GPM.

The new Roper reduces your maintenance costs too. Because all pumps contain wearing

parts in a single-assembly cartridge, which allows maintenance personnel to make fast, easy on-site repairs. And when you need parts and service, they're a phone call away through our nationwide network of quality distributors, backed by our own inside applications engineers.

You may not know us yet. But you will soon. Because we intend to give you the same

kind of reliable positive displacement products and service that have enabled us to serve customers in a multitude of industries for more than 135 years.

For a free brochure and the name of the Roper distributor nearest you, call 1-404-335-5551.
